## PROFESSIONAL HISTORY

**Marine Inspector**, Principle surveyor of S&L Maritime Consulting LLC., Diamondhead, Mississippi. (Jan2009-Present) Responsible for conducting on/off charter surveys, casualty management and investigation, hull and cargo loss/damage, vessel owner’s representative, trip and tow surveys, general safety survey for insurance, standard condition and value, regulatory consulting, and administration.

- Conducts surveys of various types including on scene investigations, salvage operations, on/off charter, and owner’s representative. Lead surveyor for many damage and repair cases on regulated vessels, coordinated repairs with local regulatory agencies ensuring proper repair practices were upheld.
- Conducted many load/unload surveys for stability, height clearance, and proper cargo arrangement within vessel. Ensured load met with vessels intended route and service capabilities.

- Conducted mandated federal training for numerous vessel crews including areas such as MTSA/ISPS security, general safety, and lifesaving. Attended many federal examinations at company's request to assist in compliance and facilitate company in clearing any deficiencies noted during inspections.

**Marine Inspector, USCG Marine Safety Office, Sector Mobile, Al. (2005-2009)**

Large Vessel Department. Responsible for new construction, structural engineering, lifesaving, design, stability and repair of certificated vessels in one of nation's busiest ports. Led and trained numerous new marine inspectors in all aspects of marine inspections including domestic and international security.

- Lead inspector for high profile Hawaiian Superferry build (Alakai), nation's largest aluminum high speed ferry. Currently lead inspector on sister vessel under construction at Austal USA.
- Conducted shipyard inspections of vessels undergoing construction, alteration, and repairs to determine fitness for service and compliance with all applicable statutes and regulations.
- Conducted on-scene marine casualty investigations.
- Inspector for portable quarters construction projects.
- Inspector for articulated Tug and Barges, Off Shore Supply Vessels, and Small Passenger Vessel new construction projects, from inception to completion.
- Lead inspector for numerous deep draft tank and freight vessels at Alabama Shipyard.

**Marine Inspector, USCG Marine Safety Unit, Houma, LA. (2001-2005)**

First tour Marine Inspector. Responsible for inspections of the largest inspected fleet of US flagged vessels in the country. Supervised and trained personnel in facility and port operations department involving environmental protection, cleanup and regulatory compliance. Federal on Scene Investigator for many high profile incidents.

- Completed qualifications ahead of schedule for tank barge, small passenger vessels, and domestic and international security.
- An accomplished inspector of the largest marine inspected fleet in the entire country.
- Responded to numerous marine casualties. Expertly identified the root cause of problems on scene resulting in no further infractions.
- As units only Federal On-Scene Coordinator was able to respond and effectively handle numerous pollution incidents. Most notable was the spill of approximately 100,000 gallons of oil into Little Lake, LA.
- Supervised and trained 10 personnel and was responsible for their daily activities and coordination of assignments to meet organizational goals.

**Safety, Health & Environmental Specialist, USCG Group Mobile, AL. (1996-2001)**

Primary responsibilities were coordinating and supervising all activities in regards to hazardous waste, hazardous material, respiratory protection, pollution prevention and safety for over 500 personnel.

- Used communication skills to successfully organize all hazardous waste disposals for Base Mobile and 19 other tenant commands. Ensured all waste were manifested and will be tracked from "cradle to grave" to meet environmental standards. Managed budget for waste disposal, safety equipment, etc.
- Conducted safety inspections of outlying Coast Guard units to ensure that all Occupational Safety and Health Standards were upheld. Responsible for reporting and investigating personnel mishaps or accidents.
- Responsible for respiratory protection program and ensuring that members had all necessary safety and personal protective equipment.
